

HIGH-TECH PACKAGING

Victory Packaging provides solutions that protect against shock, vibration, static and other damaging factors that can affect high-value electronics in the consumer, industrial, medical, telecommunications, aerospace/defense and computing sectors.

POLYETHYLENE AND POLYURETHANE FOAM

Ideal for heavier products that need cushion packaging, Polyethylene foam (PE) is a cost-effective, close-celled foam that can be used across a wide range of applications from cold chain to automotive.

- Shock-absorbing and vibration dampening
- Strong, resilient and flexible
- Shatter proof and tear resistance
- Impervious to mold and mildew
- Reusable and recyclable

Polyurethane foam (PU) provides a custom form-fitting cushioning to securely protect products during transit. From electronics to medical equipment, Polyurethane foam offers a completely versatile solution for any packaging challenge.

- Cost-effective and customizable
- Ideal for fragile, lightweight items
- Shock-absorbing and abrasion resistant
- Recyclable

CORRUGATED INSERTS

As a strong and versatile packaging option used for a variety of shipping and storage needs, die-cut corrugated inserts can be customized to meet any product or packaging needs. Recyclable, sustainable, and a cost optimizing packaging alternative, corrugated inserts can be folded flat during shipment and then formed to create a sturdy and durable carton upon arrival.

HONEYCOMB

Tough, durable and lightweight, Honeycomb offers a cost-effective and efficient alternative to corrugated or foam. Perfect for a wide variety of applications, this eco-friendly packaging material boosts high temperature and noise insulation properties. Honeycomb is available in a wide variety of sizes and paper combinations to meet your engineered needs.

RETENTION & SUSPENSION PACKAGING

Korrvu® Retention packaging, a Sealed Air product, provides a safe, cost-effective protective packaging that securely holds products in place during shipping.

- Unique frame ideal for heavy and fragile products
- Reusable and transparent
- Provides additional bottom cushioning
- Excellent visibility and display

Korrvu® Suspension packaging, a Sealed Air product, is a unique protective packaging solution that compliments all product appearances. Holding products in the airspace of shipping containers between two layers of resilient low-slip film that holds up throughout shipment even when repeatedly dropped.

- Consistent protection for fragile products
- Easy to use and assemble
- Ideal for return shipments and multiple uses
